

Compass Directions:

Using a small paper plate attach the “NSEW” letters in the appropriate places. Next, color and cut out the pointer. Push your brad through at the dot and glue in place. When dry attach the pointer with the brad to the center of the plate, make the hole loose enough so it may be turned from below.

Arrow Sign Instructions:

(best if printed on cardstock)

You will need a cardboard tube from wrapping paper or paper towels and an empty milk carton you have filled with dried beans or rice.

- 1) Color the arrow and cut it out.
- 2) Attach the arrow to the cardboard tube with a brad, so it looks like a sign post.
- 3) Stand the tube up in the milk carton.

The arrow can be turned to point the other direction when prompted in the show.
